

## Measures undertaken by Buildings & Estates already.

Use of potable mains water for landscaping has stopped on campus (non potable water is used).

All outdoor potable water taps to be disconnected.

Daily checks on the site water network, checking for leaks and running taps.

Review of toilet facilities on campus for leaking cisterns and urinals.

Advice and assistance to units to help reduce water consumption.

Daily contact with Irish Water and Galway City/County Councils for updates.

## Suggestions to conserve and reduce water consumption on Campus

Report to Buildings & Estates any leaking taps or pipes to the Helpdesk Telephone: extension 2134 or log on PEMAC.

Eliminate/reduce the use of potable drinking water for non essential work within labs, canteens and kitchens.

## Ideas to reduce water consumption at Home

Choose to have a shower over a bath, showers use only half the amount of water used in a bath.

Run your washing machine and dish washers on full loads only.

When brushing your teeth or shaving, turn off the tap and save up to six litres of water per minute.

Place a basin in the sink to wash dishes by hand and for collecting the water used to rinse fruit and vegetables.

Keep a jug of water in the fridge instead of running the cold tap, which can waste 10 litres per day of water.
