

## Invitation to register on the BioTecMar network.

### Support development of an integrated value chain for production of value added compounds/ingredients originating from Atlantic marine resources?

*Marine by-products and products derived from fishing, aquaculture, seaweed and food industries generate raw materials for production of valuable ingredients for food, animal and human nutrition, cosmetics and health. Today, these raw materials are under-exploited.*

BioTecMar supports the development of an integrated marine resource community through the creation of a BioTecMar network containing details of Research & Development labs, knowledge transfer centres and companies (in the Atlantic area) involved in the marine sector, from raw material collectors and producers to processors and producers of ingredients/active compounds. The BioTecMar project seeks to gather and encourage all interested parties involved in the addition of value to marine resources (products and by-products) to register on the BioTecMar network.

#### A main objective of the project is the creation of a BioTecMar network in order to:

- Facilitate exchanges and meetings between members.
- Collect, update and disseminate information and documentation.
- Facilitate and promote collaborative initiatives between members.
- Support development of research activities and technological transfers.
- Promote pilot actions and activities demonstrating the utilisation of marine resources.

#### Benefits to becoming a member of the BioTecMar Network:

- Access to technical sessions and training.
- Notification of conferences and seminars.
- Networking opportunities to establish contacts/partnerships with companies and R & D labs.
- BioTecMar newsletter.
- Access to a database of the registered participants on the BioTecMar network.
- Business opportunities available online.
- Ability to publish by-product offers or requests in a dedicated area of the BioTecMar network.

Register now at [www.biotecmar.eu](http://www.biotecmar.eu)

Biotecmar partners will acknowledge your registration by sending your «LOGIN» and «PASSWORD».

Don't hesitate to contact us ([contact@biotecmar.eu](mailto:contact@biotecmar.eu)) for additional information.

Thank you for your collaboration.

**The BioTecMar team.**
