

UREKA MolRec 2011

Molecular Recognition: Translating Design into Application

Summer Undergraduate UREKA MolRec positions available from **June 1st to August 20th.**

Molecular Design

**MOLECULAR
RECOGNITION**

Biophysical
Characterisation

Biological
Studies

The UREKA (Undergraduate Research Experience & Knowledge Award) programme supports 3rd year undergraduate students carrying out original and challenging research during the summer months. The UREKA MolRec site, at the National University of Ireland, Galway, offers research projects that are focused on aspects of molecular recognition from molecular design to biophysical and biological characterisation. National and international undergraduate students with backgrounds in chemistry, biochemistry, microbiology, molecular biology, and pharmacology and therapeutics are encouraged to apply.

For more information about the UREKA programme and MolRec projects and mentors please go to www.nuigalway.ie/urekamolrec.

Closing date for applications will be 5:00 pm GMT on March 4th, 2011.
