MSc in International Accounting & Analytics

- Shortlisted for Best New Postgraduate Programme
- Exemptions* from Professional Accounting Examinations
- SAP Certification
- KPMG led Analytics Summer School

This full year postgraduate programme is suitable for business related graduates who wish to pursue a career as a professional accountant in industry or practice and combine this with the study of business intelligence and big data analytics. This programme will enhance your analytical skills. Data and analytics is now a key priority for the leading professional accounting firms. This programme will equip you with a firm foundation in accounting, auditing, and financial reporting coupled with data and analytics skillsets so that you can apply advanced technologies with ease in a changing business environment.

The programme is delivered by highly experienced and dedicated faculty and integrates an academically rigorous and challenging real-world accounting education with analytics skills development which relies on active and continuous engagement from students. Students on our programme will develop the ability to perform insightful analysis to underpin time pressured problem solving, drawing on their enhanced critical thinking abilities as the programme progresses. Our MSc in International Accounting & Analytics provides you with the knowledge, transferrable skills and confidence to take up accounting and finance career development roles in practice and industry.

* Please note: exemptions from the examinations of the professional accounting bodies are subject to change of syllabus/content.

Meet the Lecturers

Our outstanding faculty are recognized as experts in their field by practitioners and by other academics. They contribute to industry, the public sector, society and academia through internationally recognized quality engagement and research.

Dr. Geraldine Robbins
Academic Programme Director

“The corporate finance modules on this programme require students to engage with tools and techniques to provide good quality information for managers to make investment, financing, dividend and risk management decisions in a variety of business contexts. Students develop not only technical skills but their ability to think critically and integrate disciplinary knowledge so that decisions take cognisance of global, social, cultural and changing business contexts.”

KPMG Led Analytics Summer School

“We are in an age where more data is being created faster than ever before, with less than 1% of data ever being used or analysed. Therefore, the ability to analyse and use this data is a key challenge for all professions, including audit and accounting. The summer school is a mix of lectures and practical breakout sessions where participants will see how KPMG uses its Data & Analytics tools to harness the power of technology and bring greater vigour, precision and meaningful insights in the increasing age of data.”

Laurence May
Principal, KPMG and Adjunct Professor, NUI Galway

Career Opportunities

As a graduate of the MSc in International Accounting and Analytics, you will have developed an understanding of cutting edge design and use of systems and processes to leverage best use of organizational data to facilitate performance management of organisations. You will be well positioned within the accounting function and management team to lead and manage organisations to achieve their strategic objectives.

What Our Employers Say

“Analytics is the key skill that differentiates an accountant from a true business partner, and can ultimately define the career of an accountant as analytics brings more meaning, life and understanding into accounting information.”

Conor Clifford
Director of Finance – Medtronic
NUI Galway Graduate

What our students say

“Studying the MSc International Accounting and Analytics in NUI Galway is one of the wisest career decisions I’ve ever made. I have gained professional knowledge from both intensive accounting modules and the practical summer schools which involve cooperation with KPMG and leading international academicians. Through learning about big data and taking a SAP module, I have gained insights into and critical skills for managing big data and data analytics. I have to say that the learning experience of the entire MSc International Accounting and Analytics programme in NUI Galway has played a significant role in landing job offers from the “Big Four” for me. I really enjoyed and am so grateful for my time studying here!”

Zhiwei Mao, Pathway A Graduate 2017/2018, employed at Deloitte, Dublin

“This is an ideal programme which places a strong emphasis on understanding current business needs whilst equipping us with analytical skills required for employment in business. The professors and the course director especially are very supportive and provide plenty of guidance throughout the course about career paths. The KPMG Summer School offers an excellent platform to acquire experience of accounting and analytical tools and techniques used in big four accounting firms. For me, this NUI Galway MSc programme is a stepping stone towards an exciting and successful career.”

Sonal Sail, Pathway A Graduate 2017/2018, employed at Planet
