--

Applicant Role/Position

--

Project outline

Description of the proposed study: title, aim, duration

--

Cohort justification

Description of samples requested: (tissue, blood, serum, tumour/normal etc)

--

Laboratory methods

Description of planned laboratory methods

--

Project renewal

Have you previously used Cancer Biobank samples?

--

Terms and Conditions

The Applicant agrees keep the samples secure and ensure that no-one, other than the end user (Researcher) and authorised co-workers, has access to them.

The Applicant agrees ensures that the samples will be used only for the proposed research study.

The Applicant may publish results generated from using the samples. Any resulting publication(s) or presentation(s) will include the collaborating Cancer Biobank principal investigator(s) as co-author(s), with the affiliation of “Discipline of Surgery, NUI Galway”.

Publications will acknowledge the “Cancer Biobank, NUI Galway” as the source of the samples in all relevant communications.

The Applicant shall ensure that the samples are used in accordance with good laboratory practice, by trained personnel. The Applicant will comply with applicable regulations governing the transportation, storage or use of the samples.

The Cancer Biobank will provide resources (personnel, consumables) for the collection and storage of biobank samples. Further processing costs (e.g. nucleic acid extraction kits) will be paid for by the Applicant.

The Applicant institution will pay shipping costs when Samples are to be transported to the Recipient/End User.
