Dating with a Diagnosis

What are the experiences of people with a diagnosis of Multiple Sclerosis as they date, start relationships and use apps and online dating sites?

We are seeking men and women over the age of 18 to take part in a research study.

The study involves a new and exciting way of gathering your views – voice-recorded diaries!

Contact jackie.fox@nuigalway.ie or sinead.hynes@nuigalway.ie for more information
